INVESTMENT OBJECTIVE AND STRATEGY

The **EASTWEST PESO MONEY MARKET** Fund (the “Fund”) aims to provide its participants liquidity and stable income derived from diversified portfolio of bank deposits and fixed income instruments with remaining terms to maturity of not more than three (3) years and has a weighted average portfolio life of one (1) year or less. The fund will be managed by EW Trust Division. It is ideal for investors with moderate risk profile with a one-year investment time horizon. The Fund aims to exceed the return of the Bloomberg Philippine Sovereign Bond Index Money Market, Adjusted.

The Benchmark: The Benchmark is the Bloomberg Philippine Sovereign Bond Index Money Market (BPHILMM).

Description of the Benchmark

- The BPHILMM is a rules-based market-value weighted index engineered to measure the fixed-rate and zero-coupon local currency securities publicly issued by the Philippines, including retail securities. To be included in the index, a security must have a minimum par amount of PHP 3 billion. (Source: Bloomberg)

- **THE UIT FUND IS A TRUST PRODUCT, NOT A DEPOSIT ACCOUNT, AND IS NOT INSURED BY NOR GOVERNED BY THE PHILIPPINE DEPOSIT INSURANCE CORPORATION (PDIC).**
- **DUE TO THE NATURE OF THE INVESTMENTS, THE RETURNS/YIELDS CANNOT BE GUARANTEED AND HISTORICAL PERFORMANCE, WHEN PRESENTED IS PURELY FOR REFERENCE PURPOSES AND IS NOT A GUARANTEE OF SIMILAR FUTURE PERFORMANCE.**
- **ANY LOSSES AND INCOME ARISING FROM MARKET FLUCTUATIONS AND PRICE VOLATILITY OF THE SECURITIES HELD BY THE UITF, EVEN IF INVESTED IN GOVERNMENT SECURITIES, ARE FOR THE ACCOUNT OF THE CLIENT.**
- **AS SUCH, THE UNITS OF PARTICIPATION OF THE CLIENT IN THE UITF, WHEN REDEEMED, MAY BE WORTH MORE OR WORTH LESS THAN HIS/HER INITIAL INVESTMENT/CONTRIBUTION.**
- **THE TRUSTEE IS NOT LIABLE FOR ANY LOSS UNLESS UPON WILLFUL DEFAULT, BAD FAITH OR GROSS NEGLIGENCE.**
- **THE UIT FUND IS NOT AN OBLIGATION OF, NOR GUARANTEED, NOR INSURED BY THE TRUSTEE, ITS AFFILIATES OR SUBSIDIARIES.**
- **THE INVESTOR MUST READ THE COMPLETE DETAILS OF THE FUND IN THE UITF’S DECLARATION OF TRUST, MAKE HIS/HER OWN RISK ASSESSMENT, AND WHEN NECESSARY, SEEK AN INDEPENDENT/ PROFESSIONAL OPINION BEFORE MAKING AN INVESTMENT.**

Key Characteristic of the Benchmark

- The BPHILMM tracks the performance of peso-denominated bonds issued by the Philippine government. It comprises zero-coupon and fixed rate securities with tenors less than or equal to a year.

Use of the Benchmark

- The benchmark provides a standard for evaluating the Fund's performance by providing a comparable metric given the fixed income assets of the portfolio for investors/participants to understand how the Fund is performing. The fund's goal is to outperform this benchmark.
- **There are immaterial misalignments between the benchmark and the Fund since the benchmark is not net of taxes.** The benchmark only tracks the price movements of its underlying securities. Taxes and other fees deducted from the Fund also affect the Net Asset Value.

Sources for more detailed information:

- Bloomberg. For additional information on the benchmark, investors may send an email to Bloomberg via indexhelp@bloomberg.net
- Additional information on the benchmark and/or its administrator can be made available to the investor upon request.

CLIENT SUITABILITY

Client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Fund is suitable for investors who:

- Have a moderate risk appetite
 - Are looking for a portfolio which may provide higher income than traditional time deposits but requires short-term liquidity with a one-year investment time horizon.
 - Are willing to accept moderate risks involving volatility of return and possible erosion of principal for potentially better short-term results
-

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- The value of the investment is based on the Net Asset Value per unit (NAVpu) of the Fund which uses a marked-to-market valuation and therefore may fluctuate daily. Investment in a UITF does not provide guaranteed returns. Principal and earnings from investment in the Fund can be lost in whole or in part when the NAVpu at the time of redemption is lower than the NAVpu at the time of participation.
- The Fund is exposed to the following risks:
 - **Country/ Political Risk.** Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs and tax increases.
 - **Market Risk.** Market risk is the risk that the value of the fund investment will be negatively affected by the fluctuations in the price level of its underlying instruments.
 - **Inflation Risk.** Affecting all investments, inflation reduces the purchasing power of money.
 - **Liquidity Risk.** Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. This is minimized by investing in marketable securities.
 - **Interest Rate Risk.** The value of fixed-income investments such as notes and bonds generally fall when interest rates rise. The potential for loss is typically greater for securities that have a longer term to maturity, have a longer duration or have a lower yield or coupon rate.
 - **Reinvestment Rate Risk.** This is the risk of reinvesting interest earnings at a rate lower than the original investment.

- **Credit Risk.** Bonds represent a loan made to the issuer of the bond. The credit worthiness of the bond issuer is the issuer's ability to pay interest and principal on time, which can change during the life of the bond. Issuers with a higher risk of defaulting pay the highest yields.
- **Other Risks.** Participation in the UITF may be further exposed to the risk of any actual or potential conflicts of interest relative to in-house transactions by the Trustee.
- These are the principal risk factors which may affect the performance of the Fund. If you would like more information before you invest, please consult the most recent Declaration of Trust (DOT). The rights and duties of the investor are in the DOT.
- The Fund employs a risk management policy based on duration. Duration measures the sensitivity of NAVPU to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates.

OTHER DISCLOSURES

OUTLOOK AND STRATEGY. Local bond yields fell 2.8 basis points on average after weak inflation persisted for fourth consecutive month in June (+1.4% yoy), which prompted BSP Eli Remolona to indicate that two rate cuts were possible later this year. The trade deal between the US and Philippines also removed a layer of uncertainty from the market. We expect the trend of sub-2% inflation to continue with July CPI likely at just under +1.0%, which further supports the need for more rate cuts later this year.

PROSPECTIVE INVESTMENTS. The Fund's prospective investments may include securities issued or guaranteed by the Philippine government, tradable securities issued by financial institutions or private corporations, marketable instruments and loans that are traded in an organized exchange, bank deposits, similar collective investment vehicles subject to existing BSP regulations, and such other investment outlets/categories the BSP allow.

Issuers with a higher risk of defaulting pay the highest yields.
- **Market Risk.** Market Risk is the possibility for an investor to experience losses due to changes in market prices of securities. It is the risk of a UITF to lose value due to a decline in the prices of securities, which may sometimes happen rapidly or unexpectedly. There are market factors affecting all securities that cannot be controlled by diversification, such as the sentiment of investors as a whole which is unpredictable. Market downturns can come swiftly and last a long time.
- **Liquidity Risk.** Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. Liquidity risk is minimized by investing in marketable securities.
- **Inflation Risk.** Inflation is the general upward price movement of goods or services in an economy, resulting to a reduction in the purchasing power of money. Inflation affects all investments. An investor would want the value of his investment to keep pace or exceed the rate by which the prices of goods and services go up. Historically, inflation risk is greatest for short-term guaranteed securities like time deposits and treasury bills.
- **Country Risk.** Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs, tax increases, and other changes in regulations.”

INVESTMENT OBJECTIVE AND STRATEGY

The **EASTWEST DOLLAR INTERMEDIATE TERM BOND FUND** (the “Fund”) is a USD-denominated Fixed Income fund that intends to provide its participants the potential to earn enhanced intermediate-term returns by investing in sovereign bonds issued by the Republic of the Philippines and other countries, corporate notes and bonds, term deposits and other tradable instruments. The Fund has a weighted average portfolio life of between one (1) to three (3) years. Outside of the context of a portfolio, it is suitable for investors seeking capital growth over an investment time horizon of at least three (3) years through a managed portfolio of fixed-income instruments.

The portfolio’s benchmark was changed to the **EM USD Aggregate Philippine Sovereign 1-3 Index**, replacing the previous blend of 25% Bloomberg USD Emerging Market Philippines Sovereign Bond Index and 75% Average Philippine US Dollar Savings Deposit Rate, effective April 16, 2025, in order to provide a more comparable measure of returns, in

line with the fund's amended strategy to maintain a weighted average portfolio life of between one to three years. The Fund aims to exceed its benchmark.

The Benchmark: The Fund's benchmark is EM USD Aggregate Philippine Sovereign 1-3 Index (I35423 Index)

- Description of the Benchmark
 - o The Bloomberg EM USD Aggregate Philippine Sovereign 1-3 Index tracks dollar- denominated sovereign bonds issued by the Republic of the Philippines, the remaining life of which shall be between an intermediate period of 1-3 Years. The aim of the benchmark is to represent the performance of the Philippine sovereign debt market in US dollars. (Source: Bloomberg)
- Key Characteristic of the Benchmark
 - o The Bloomberg EM USD Aggregate Philippine Sovereign 1-3 Index consists of US Dollar denominated bonds that have a maturity within a 1-3 Year period. It is a Total Returns Benchmark, but its returns are not net of taxes.
- Use of the Benchmark
 - o The Fund is designed for Moderate-Risk appetite investors looking for returns on their investments through capital appreciation by investing in a managed dollar-denominated fund with an investment time horizon of at least three (3) years. The benchmark would be a comparable metric given it measures the performance of the same type of instruments, and tenors that the fund plans to invest in. The benchmark would give a comparable measure for the portfolio.
 - o **There are immaterial misalignments between the Fund and the benchmark since the benchmark is not net of taxes.** This can cause a difference between the returns of the funds compared to the returns of the benchmark.
- Relevant Sources for further benchmark information:
 - o Bloomberg. For additional information on the benchmark, investors may send an email to Bloomberg via indexhelp@bloomberg.net
 - o Additional information on the benchmark and/or its administrator can be made available to the investor upon request.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Fund is suitable for investors who:

- (a) have a moderate risk appetite and,
 - (b) looking for returns on their investments through capital appreciation by investing in a managed dollar-denominated fund with an investment time horizon of at least three (3) years
 - (c) are willing to accept moderate risks involving volatility of return and possible erosion of principal for potentially better intermediate-term results
-

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Prospective investors need to consider certain risks prior to participation in the Fund. The market value of the investment is based on the Net Asset Value per unit (NAVpU) of the Fund which uses a marked-to-market valuation and therefore may fluctuate daily. Investment in a UITF does not provide guaranteed returns. Principal and earnings from investment in the Fund can be lost in whole or in part when the NAVpU at the time of redemption is lower than the NAVpU at the time of participation.
 - Participation in this USD-denominated intermediate-term fixed income fund carry the following risks:
 - o **Interest Rate Risk.** The value of fixed-income investments such as notes and bonds generally fall when interest rates rise. The potential for loss is typically greater for securities that have a longer term to maturity, have a longer duration or have a lower yield or coupon rate.
 - o **Reinvestment Rate Risk.** This is the risk of reinvesting interest earnings at a rate lower than the original investment.

- **Credit Risk.** Bonds represent a loan made to the issuer of the bond. The credit worthiness of the bond issuer is the issuer's ability to pay interest and principal on time, which can change during the life of the bond. Issuers with a higher risk of defaulting pay the highest yields.
- **Foreign Exchange Risk.** Foreign exchange risk exists when investments are made in securities that are denominated in a currency that is different from the one spent. For example, the earnings of a USD-denominated bond investment could be reduced or even negated by an appreciation of the Philippine Peso vis-à-vis the US Dollar.
- **Market Risk.** Market risk is the risk that the value of the fund investment will be negatively affected by the fluctuations in the price level of its underlying instruments.
- **Inflation Risk.** Affecting all investments, inflation reduces the purchasing power of money.
- **Liquidity Risk.** Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. This is minimized by investing in marketable securities.
- **Inflation Risk.** Inflation is the general upward price movement of goods or services in an economy, resulting in a reduction in the purchasing power of money. Inflation affects all investments. An investor would want the value of his investment to keep pace or exceed the rate by which the prices of goods and services go up. Historically, inflation risk is greatest for short-term guaranteed securities like time deposits and treasury bills.
- **Country/ Political Risk.** Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs and tax increases.
- **Other Risks.** Participation in the UITF may be further exposed to the risk of any actual or potential conflicts of interest relative to in-house transactions by EastWest Bank-Trust.
- These are the principal risk factors which may affect the performance of the Fund. If you would like more information before you invest, please consult the most recent Declaration of Trust (DOT). The rights and duties of the investor are in the DOT.
- The Fund employs a risk management policy based on duration. Duration measures the sensitivity of NAVPU to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVPU will fluctuate in relation to changes in interest rates.

OTHER DISCLOSURES

OUTLOOK AND STRATEGY. An index of emerging market bonds posted gains despite higher US Treasury yields, which rose due to a stronger-than-expected Q2 GDP and June PCE inflation. This led the market to push back bets that the Federal Reserve will cut interest rates soon.

CLIENT SUITABILITY

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Fund is suitable for investors who:

- Have an aggressive risk appetite
 - Are looking for long-term capital growth over an investment time horizon of ten (10) years
 - Are willing to accept higher risks involving volatility of return and possible erosion of principal for potentially better long-term results
-

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- Investors may not get back the value of their original investment upon redemption.
- The value of the Fund may rise or fall. You may lose some or all of your investment depending on the performance of the underlying securities. Factors that may affect the performance of these securities include, without limitation, market risks, fluctuations in interest rates, political instability, exchange controls, changes in taxation and foreign investment policies. Some of the key risks associated with the Fund are described below:
 - **Interest Rate Risk.** The value of fixed-income investments such as notes and bonds generally fall when interest rates rise. The potential for loss is typically greater for securities that have a longer term to maturity, have a longer duration or have a lower yield or coupon rate.
 - **Reinvestment Rate Risk.** This is the risk that interest earnings, or the proceeds from the sale or maturity of a bond investment, is reinvested at a rate lower than its original investment, thus reducing the investor's periodic income.
 - **Credit Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner. Bonds represent a loan made to the issuer of the bond. The credit worthiness of the bond issuer is the issuer's ability to pay interest and principal on time, which can change during the life of the bond. Issuers with a higher risk of defaulting pay the highest yields.
 - **Market Risk.** Market Risk is the possibility for an investor to experience losses due to changes in market prices of securities. It is the risk of a UITF to lose value due to a decline in the prices of securities, which may sometimes happen rapidly or unexpectedly. There are market factors affecting all securities that cannot be controlled by diversification, such as the sentiment of investors as a whole which is unpredictable. Market downturns can come swiftly and last a long time.
 - **Liquidity Risk.** Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. Liquidity risk is minimized by investing in marketable securities.

- **Inflation Risk.** Inflation is the general upward price movement of goods or services in an economy, resulting to a reduction in the purchasing power of money. Inflation affects all investments. An investor would want the value of his investment to keep pace or exceed the rate by which the prices of goods and services go up. Historically, inflation risk is greatest for short-term guaranteed securities like time deposits and treasury bills.
- **Country Risk.** Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs, tax increases, and other changes in regulations.
- **Other Risks.** Participation in the UITF may be further exposed to the risk of any actual or potential conflicts of interest relative to in-house transactions by EastWest Bank-Trust.
- These are the principal risk factors which may affect the performance of the Fund. If you would like more information before you invest, please consult the most recent Declaration of Trust (DOT). The rights and duties of the investor are in the DOT.
- The Fund employs a risk management policy based on duration. Duration measures the sensitivity of NAVpU to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVpU will fluctuate in relation to changes in interest rates.

OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS. The Fund has bond investments in Filinvest Land amounting to P1.200 million. The investment outlets were approved by the Board of Directors. All related party transactions are conducted on a best execution and arm's length basis.

OUTLOOK AND STRATEGY. Local bond yields fell 2.8 basis points on average after weak inflation persisted for fourth consecutive month in June (+1.4% yoy), which prompted BSP Eli Remolona to indicate that two rate cuts were possible later this year. The trade deal between the US and Philippines also removed a layer of uncertainty from the market. We expect the trend of sub-2% inflation to continue with July CPI likely at just under +1.0%, which further supports the need for more rate cuts later this year.

PROSPECTIVE INVESTMENTS. The Fund's prospective investments include securities issued by or guaranteed by the Philippine government, marketable fixed income securities issued or guaranteed by corporations and traded in an organized exchange, securities issued or guaranteed by any government of a foreign country or any political subdivision of a foreign country, securities issued or guaranteed by any supranational entity, loans traded in an organized exchanged, savings and time deposits in any bank or financial institution, and other tradable investment outlets categories as the BSP may allow.

The Fund will be passively managed by EastWest Banking Corporation through its Trust and Asset Management Group. It is ideal for investors with a long-term investment horizon of at least ten (10) years. The fund aims to track the return of the Philippine Stock Exchange Composite Index (PSEi).

- Description of the Benchmark
 - The Philippine Stock Exchange (the “PSE”) Index measures the relative changes in the free float-adjusted market capitalization of the 30 largest and most active common stocks listed at the PSE. (Source: Philippine Stock Exchange, Inc.)
- Key Characteristic of the Benchmark
 - The PSEi’s bucket of the top thirty (30) common stocks are based on a fixed set of rules that allow it to represent the general movement of the Philippine stock market.
- Relation of the Benchmark’s to the fund’s objectives or investment strategies
 - The fund is designed for high-risk appetite investors looking for returns on their investments through capital appreciation of their investment. The fund will invest in Equities listed in the Philippine Stock Exchange. However, there is some misalignment between the fund and benchmark. The PSEi is not a Total Returns Index, nor is it net of taxes.
 - There are immaterial misalignments between the benchmark and the Fund since the benchmark is not net of taxes nor a total returns index. The benchmark only tracks the price movements of its underlying securities. The Fund’s underlying securities may generate dividends which may be reinvested back into its Net Assets.
- Sources for more detailed information

CLIENT SUITABILITY

Client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Fund is ideal for investors who:

- (a) have aggressive risk appetite; and
- (b) are looking for capital growth with a long-term investment horizon of at least ten (10) years.
- (c) are willing to accept higher risks involving volatility of returns and even possible loss of investment in return for potential higher long-term results

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

The value of the investment is based on the Net Asset Value per unit (NAVpu) of the Fund which uses a marked-to-market valuation and therefore may fluctuate daily. Investment in a UITF does not provide guaranteed returns. Principal and earnings from investment in the Fund can be lost in whole or in part when the NAVpu at the time of redemption is lower than the NAVpu at the time of participation.

The Fund which shall be substantively invested in a diversified portfolio of listed Philippine shares of stock is exposed to the following risks:

- **Business Risk.** Stockholders as fractional owners of corporations share in the fortunes of the business. The rise and fall of stock prices often reflect the market's perception of the prospects of corporations and their management to reward stockholders for taking risks unique to each business. Business risk can be reduced through diversification.
- **Country/ Political Risk.** Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs and tax increases.
- **Market Risk.** Market risk is the risk that the value of the fund investment will be negatively affected by the fluctuations in the price level of its underlying instruments.
- **Inflation Risk.** Affecting all investments, inflation reduces the purchasing power of money.
- **Liquidity Risk.** Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. This is minimized by investing in marketable securities.

OTHER DISCLOSURES

OUTLOOK AND STRATEGY. Local stocks fell 1.7% in July, ending five-month winning streak, ahead of President Trump's deadline for trade deals on August 1st. Market optimism fizzled after trade talks between the Marcos and Trump administrations resulted in a final tariff rate of 19% on PHL goods, two basis points higher than the original tariff rate announced in early-April. Meanwhile, June inflation (+1.4%) was slower than the median forecast and below the BSP's target range of 2%-4% for the fourth consecutive month. We expect this streak to extend for another month with July CPI likely at just under +1.0%. This should give policymakers more room to cut interest rates ahead this year

at least ten (10) years who want to have exposure in Philippine stocks and who understand the investment risks involved when investing in equity securities.

As a feeder fund, this Fund is mandated to invest at least 90% of its assets in a single collective investment scheme or target fund. The target fund is the Philequity, Inc.. It is an actively managed equity mutual fund, by Philequity Management inc. Its investment objective is to exceed the returns of the PSEi, by investing in the same equities listed in the Philippine Stock Exchange.

The Feeder fund's aim is to match or exceed the return of the **Philippine Stock Exchange Composite Index (PSEi)**.

Description of the Benchmark

- The Philippine Stock Exchange Composite Index measures the relative changes in the free float-adjusted market capitalization of the 30 largest and most active common stocks listed at the PSE. (Source: Philippine Stock Exchange, Inc.)

Key Characteristics of the Benchmark

- The PSEi's bucket of the top thirty (30) common stocks are based on a fixed set of rules that allow it to represent the general movement of the Philippine stock market.

Use of the Benchmark

- The fund is designed for high-risk appetite investors looking for returns on their investments through capital appreciation. The fund will invest in Equities listed in the Philippine Stock Exchange.
- However, there is some misalignment between the fund and benchmark due to the Total Returns and taxable nature of the Fund which can create differences in returns. The PSEi is not a Total Returns Index, nor is it net of taxes.

Sources for further benchmark information:

- Philippine Stock Exchange (pse.com.ph)
- Bloomberg. For additional information on the benchmark, investors may send an email to Bloomberg via indexhelp@bloomberg.net.
- Additional information on the benchmark and/or its administrator can be made available to the investors upon request.

CLIENT SUITABILITY

Client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Fund is suitable for investors who:

- (a) have aggressive risk appetite; and
 - (b) are looking for capital growth over an investment time horizon of at least ten (10) years who want to have exposure in Philippine stocks.
 - (c) Are willing to accept higher risks involving volatility of returns and even possible loss of investment in return for potential higher long-term results
-

KEY RISKS AND RISK MANAGEMENT

You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.

- The target fund, Philequity Fund Inc., employs a risk management policy based on appropriate diversification of investments intended to generate long-term appreciation of the Fund.
- The value of the investment is based on the Net Asset Value per unit (NAVpu) of the Fund which uses a marked-to-market valuation and therefore may fluctuate daily. Investment in a UITF does not provide guaranteed returns. Principal and earnings from investment in the Fund can be lost in whole or in part when the NAVpu at the time of redemption is lower than the NAVpu at the time of participation.
- The Fund which shall be substantively invested in a diversified portfolio of listed Philippine shares of stock is exposed to the following risks:

EastWest Bank – Trust & Asset Management Group, 3F EastWest Corporate Center, 5th Ave. cor. 23rd St., Bonifacio Global City Taguig. *For inquiries and feedback, you may call EastWest's 24-Hour Customer Service at 8888-1700 or email trustmarketing@eastwestbanker.com*

- **Business Risk.** Stockholders as fractional owners of corporations share in the fortunes of the business. The rise and fall of stock prices often reflect the market's perception of the prospects of corporations and their management to reward stockholders for taking risks unique to each business. Business risk can be reduced through diversification.
- **Country/ Political Risk.** Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs and tax increases.
- **Market Risk.** Market risk is the risk that the value of the fund investment will be negatively affected by the fluctuations in the price level of its underlying instruments.
- **Inflation Risk.** Affecting all investments, inflation reduces the purchasing power of money.
- **Liquidity Risk.** Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. This is minimized by investing in marketable securities.
- **Interest Rate Risk.** The value of fixed-income investments such as notes and bonds generally falls when interest rates rise. The potential for loss is typically greater for securities that have a longer term to maturity, have a longer duration or have a lower yield or coupon rate.
- **Reinvestment Rate Risk.** This is the risk of reinvesting interest earnings at a rate lower than the original investment.
- **Credit Risk.** Bonds represent a loan made to the issuer of the bond. The credit worthiness of the bond issuer is the issuer's ability to pay interest and principal on time, which can change during the life of the bond. Issuers with a higher risk of defaulting pay the highest yields.

These are the principal risk factors which may affect the performance of the Fund. If you would like more information before you invest, please consult the most recent Declaration of Trust (DOT). The rights and duties of the investor are in the DOT.

OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS. The Fund's target fund (PhilEquity Fund, Inc.) has holdings of East West Banking Corporation common shares.

OUTLOOK AND STRATEGY. Local stocks fell 1.7% in July, ending five-month winning streak, ahead of President Trump's deadline for trade deals on August 1st. Market optimism fizzled after trade talks between the Marcos and Trump administrations resulted in a final tariff rate of 19% on PHL goods, two basis points higher than the original tariff rate announced in early-April. Meanwhile, June inflation (+1.4%) was slower than the median forecast and below the BSP's target range of 2%-4% for the fourth consecutive month. We expect this streak to extend for another month with July CPI likely at just under +1.0%. This should give policymakers more room to cut interest rates ahead this year.

PROSPECTIVE INVESTMENT. The Fund's prospective investments, depending on availability and market development, may include but are not limited to, PhilEquity Fund, Time Deposits, Government Securities and tradable fixed income securities issued by local financial institutions or private corporations. Investment in the PhilEquity Fund may amount up to 100% of total assets but shall not fall below 90% of total assets of the Fund.

least 90% of its assets into its target fund, the iShares Core S&P 500 Exchange Traded Fund. The target fund tracks the benchmark. Its target fund holds the same underlying securities at the same weightings as the benchmark. It is ideal for investors with a long-term investment horizon who want to have a global exposure in stocks and who understand the investment risks involved when investing in equities. To invest in these securities, the Fund has East West Banking Corporation as Trustee.

- Description and Key Characteristics of the Benchmark
 - o The S&P 500 is a stock market index tracking the performance of 500 large-cap companies listed on stock exchanges in the United States. It's considered a broad measure of the U.S. equity market and is often used as a benchmark for investment performance. The index is weighted by market capitalization, meaning companies with higher stock prices have a larger influence on the index's movement. It is not a Total Returns Benchmark nor is it net of taxes.
- Relation of the Benchmark's to the fund's objectives/investment strategies
 - o The fund is designed for high-risk appetite investors looking for returns on their investments that track the return of the Index Benchmark. As a feeder fund, this will invest in a fund that tracks the S&P 500 index. The benchmark would be the most appropriate as it aims to track its performance. However, there are misalignments between the fund and benchmark since the S&P 500 Index is not a Total Returns Index, nor is it net of taxes.
- Sources for more detailed information
 - o S&P Dow Jones Indices (S&P 500® | S&P Dow Jones Indices (spglobal.com))
 - o Bloomberg. For additional information on the benchmark, investors may send an email to Bloomberg via indexhelp@bloomberg.net.
 - o Additional information on the benchmark and/or its administrator can be made available
 - o to the investors upon request.

OTHER DISCLOSURES

OUTLOOK AND STRATEGY. The S&P 500 rallied by another 2.2% in July and is now up 7.8% year to date. Initial concerns over the impact of President Trump's tariffs on the US (and global) economy are firmly in the rear-view mirror, with the broad index now up 27.2% since its April 8 nadir. President Trump announced broad tariffs on over 90 trading partners just before his deadline for trade deals, which will be effective August 8th. Q2 earnings gave a preview of the impact of Trump's tariffs, and while almost 4 out of 5 companies have beaten earnings expectations, some have downgraded their full-year outlook. Market breadth was mixed with six sectors posting monthly gains (led by technology, utilities, and industrials) against five sectors that posted losses (led healthcare, consumer staples and materials).

PROSPECTIVE INVESTMENT. The Fund's prospective investments, depending on availability and market development, may include but are not limited to, iShares Core S&P 500 ETF, Time Deposits, Government Securities and tradable fixed income securities issued by local financial institutions or private corporations. Investment in the iShares Core S&P 500 ETF may amount to 100% of total assets but shall not fall below 90% of total assets of the Fund.
