**INVESTMENT OBJECTIVE AND STRATEGY**

The Fund aims to provide its participants with liquidity and stable income derived from diversified portfolio of fixed income instruments. The Fund shall be primarily invested in a portfolio of bank deposits and fixed income instruments with remaining terms to maturity of not more than three years and has a weighted average portfolio life of one year or less. It is ideal for investors with a moderate risk profile. The Fund's Objective is to beat its benchmark, the Bloomberg Philippine Sovereign Bond Index Money Market (BPHILMM)

**Description and Key Characteristics of the Benchmark**

- The BPHILMM is a rules-based market-value weighted index engineered to measure the fixed-rate and zero-coupon local currency securities publicly issued by the Philippines, including retail securities. To be included in the index, a security must have a minimum par amount of PHP 3 billion. (Source: Bloomberg)

- The BPHILMM tracks the performance of peso-denominated bonds issued by the Philippine government. It comprises zero-coupon and fixed rate securities with tenors less than or equal to a year. BPHILMM is not a Total Returns Index nor is it net of taxes.

#### Use of the Benchmark

- The fund will invest in peso-denominated short-term securities and interest-bearing deposits. The benchmark would give a comparable metric given the fixed income assets of the portfolio. However, there is some misalignment between the returns of the fund and benchmark. The BPHILMM is not a Total Returns Index nor is it net of taxes.

#### Relevant Sources for further benchmark information:

- Bloomberg. For additional information on the benchmark, investors may send an email to Bloomberg via [indexhelp@bloomberg.net](mailto:indexhelp@bloomberg.net)
- Additional information on the benchmark and/or its administrator can be made available to the investor upon request.

## **CLIENT SUITABILITY**

Client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Fund is suitable for investors who:

- Have a moderate risk appetite
- Are looking for stable income over an investment time horizon of one year
- Are willing to accept moderate risks involving volatility of return and possible erosion of principal for potentially better short-term results

## **KEY RISKS AND RISK MANAGEMENT**

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.**

- Investors may not get back the value of their original investment upon redemption.
- The value of the Fund may rise or fall. You may lose some or all of your investment depending on the performance of the underlying securities. Factors that may affect the performance of these securities include, without limitation, market risks, fluctuations in interest rates, political instability, exchange controls, changes in taxation and foreign investment policies. Some of the key risks associated with the Fund are described below:
  - Country/ Political Risk. Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs and tax increases.
  - Market Risk. Market risk is the risk that the value of the fund investment will be negatively affected by the fluctuations in the price level of its underlying instruments.
  - Inflation Risk. Affecting all investments, inflation reduces the purchasing power of money.
  - Liquidity Risk. Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. This is minimized by investing in marketable securities.
  - Interest Rate Risk. The value of fixed-income investments such as notes and bonds generally fall when interest rates rise. The potential for loss is typically greater for securities that have a longer term to maturity, have a longer duration or have a lower yield or coupon rate.
  - Reinvestment Rate Risk. This is the risk of reinvesting interest earnings at a rate lower than the original investment.
  - Credit Risk. Bonds represent a loan made to the issuer of the bond. The credit worthiness of the bond issuer is the issuer's ability to pay interest and principal on time, which can change during the life of the bond. Issuers with a higher risk of defaulting pay the highest yields.
- These are the principal risk factors which may affect the performance of the Fund. If you would like more information before you invest, please consult the most recent Plan Rules or Declaration of Trust (DOT). The rights and duties of the investor are in the DOT.

## **OTHER DISCLOSURES**

**RELATED PARTY TRANSACTIONS.** The Fund has a time deposit with East West Bank amounting to P33.12 million. The investment outlets were approved by the Board of Directors. All related party transactions are conducted on a best execution and arm's length basis.

**OUTLOOK AND STRATEGY.** The Bangko Sentral ng Pilipinas cut its policy rate in December to bring its policy rate to 4.5% after November CPI rose 1.5% yoy, the 9th consecutive month of sub-2% headline inflation. However, bond yields rose nearly 10 basis points on average after BSP Governor Eli Remolona, Jr. indicated the BSP's monetary policy easing cycle is nearing its end and that future rate cuts, if any, would be limited.

**PROSPECTIVE INVESTMENTS.** The Fund's prospective investments may include securities issued or guaranteed by the Philippine government, tradable securities issued by financial institutions or private corporations, marketable instruments and loans that are traded in an organized exchange, bank deposits, similar collective investment vehicles subject to existing BSP regulations, and such other investment outlets/categories the BSP allow.

**INVESTMENT OBJECTIVE AND STRATEGY**

The Fund aims to achieve for its participants the potential to enhanced intermediate term returns by investing in sovereign bonds issued by the Republic of the Philippines and other countries, corporate notes and bonds, term deposits and other tradable securities. The Fund maintains a weighted average portfolio life of between one to three years for the fixed income component of the portfolio. The portfolio's benchmark was changed to the **EM USD Aggregate Philippine Sovereign 1-3 Index**, replacing the previous blend of 25% Bloomberg USD Emerging Market Philippines Sovereign Bond Index and 75% Average Philippine US Dollar Savings Deposit Rate, effective April 16, 2025, in order to provide a more comparable measure of returns, in line with the fund's amended strategy to maintain a weighted average portfolio life of between one to three years. The Fund aims to exceed its benchmark.

- Description and Key Characteristics of the new Benchmark
  - o The Bloomberg EM USD Aggregate Philippine Sovereign 1-3 Index tracks the performance of US Dollar denominated bonds issued by the Philippine Government that have a maturity within a 1-3 year period. It is a Total Returns Benchmark, but its returns are not net of taxes.
- Relation of the Benchmark's use to the fund's objectives/investment strategies
  - o The fund is designed for moderate-risk appetite investors looking for returns on their investments through capital appreciation by investing in a managed dollar-denominated fund. The fund will invest in dollar-denominated intermediate-term securities. The benchmark would be a comparable metric given it measures the performance of the same/similar type of instruments, and tenors that the fund invests in.

## **OTHER DISCLOSURES**

**RELATED PARTY TRANSACTIONS.** The Fund a time deposit with East West Bank amounting to USD 145,872.39. The investment outlets were approved by the Board of Directors. All related party transactions are conducted on a best execution and arm's length basis.

**OUTLOOK AND STRATEGY.** US Treasury yields fell 6 basis points on average in December after the Federal Reserve cut its policy rate by 25 basis points, but the US Treasury yield curve steepened as inflation remained elevated. Worries over tariffs and inflation running above the Fed's 2% target were persistent themes all year, but bond yields still ended the year 62 basis points lower on average from the prior year. An index of USD-denominated emerging market bonds inched 0.6% higher in December as the spread between 10y EM bonds and the 10y UST narrowed.

**PROSPECTIVE INVESTMENTS.** The Fund's prospective investments include securities issued by or guaranteed by the Philippine government, marketable fixed income securities issued or guaranteed by corporations and traded in an organized exchange, securities issued or guaranteed by any government of foreign country or any political subdivision of foreign country, securities issued or guaranteed by any supranational entity, loans traded in an organized exchange, savings and time deposits in any bank of financial institution, and other tradable investment outlets categories as the BSP may allow.

- The BPHILR is not net of taxes. Due to the taxable nature of the Fund, there are minor and immaterial misalignments between the Fund and the benchmark.

#### Use of the Benchmark

- The fund is designed for Aggressive Risk appetite investors looking for Higher returns on their investment through capital appreciation. The fund will invest in peso-denominated long-term securities. The BPHILR is not net of taxes.
- However, there is an immaterial misalignment between the returns of fund and benchmark. This is due to the Taxable nature of the fund, which can create immaterial differences.

## **CLIENT SUITABILITY**

A client profiling process shall be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Fund is suitable for investors who:

- Have an aggressive risk appetite
- Are looking for long-term capital growth over an investment time horizon of ten (10) years
- Are willing to accept higher risks involving volatility of return and possible erosion of principal for potentially better long-term results

## **KEY RISKS AND RISK MANAGEMENT**

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.**

- Investors may not get back the value of their original investment upon redemption.
- The value of the Fund may rise or fall. You may lose some or all of your investment depending on the performance of the underlying securities. Factors that may affect the performance of these securities include, without limitation, market risks, fluctuations in interest rates, political instability, exchange controls, changes in taxation and foreign investment policies. Some of the key risks associated with the Fund are described below:
  - **Interest Rate Risk.** The value of fixed-income investments such as notes and bonds generally fall when interest rates rise. The potential for loss is typically greater for securities that have a longer term to maturity, have a longer duration or have a lower yield or coupon rate.
  - **Reinvestment Rate Risk.** This is the risk that interest earnings, or the proceeds from the sale or maturity of a bond investment, is reinvested at a rate lower than its original investment, thus reducing the investor's periodic income.
  - **Credit Risk.** This is the possibility for an investor to experience losses due to a borrower's failure to pay principal and/or interest in a timely manner. Bonds represent a loan made to the issuer of the bond. The credit worthiness of the bond issuer is the issuer's ability to pay interest and principal on time, which can change during the life of the bond. Issuers with a higher risk of defaulting pay the highest yields.
  - **Market Risk.** Market Risk is the possibility for an investor to experience losses due to changes in market prices of securities. It is the risk of a UITF to lose value due to a decline in the prices of securities, which may sometimes happen rapidly or unexpectedly. There are market factors affecting all securities that cannot be controlled by diversification, such as the sentiment of investors as a whole which is unpredictable. Market downturns can come swiftly and last a long time.
  - **Liquidity Risk.** Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. Liquidity risk is minimized by investing in marketable securities.

EastWest Bank – Trust & Asset Management Group, 3F EastWest Corporate Center, 5<sup>th</sup> Ave. cor. 23<sup>rd</sup> St., Bonifacio Global City Taguig. *For inquiries and feedback, you may call EastWest's 24-Hour Customer Service at 8888-1700 or email [trustmarketing@eastwestbanker.com](mailto:trustmarketing@eastwestbanker.com)*

EastWest Bank is regulated by the Bangko Sentral ng Pilipinas  
<https://www.bsp.gov.ph>

- **Inflation Risk.** Inflation is the general upward price movement of goods or services in an economy, resulting to a reduction in the purchasing power of money. Inflation affects all investments. An investor would want the value of his investment to keep pace or exceed the rate by which the prices of goods and services go up. Historically, inflation risk is greatest for short-term guaranteed securities like time deposits and treasury bills.
- **Country Risk.** Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs, tax increases, and other changes in regulations.
- **Other Risks.** Participation in the UITF may be further exposed to the risk of any actual or potential conflicts of interest relative to in-house transactions by EastWest Bank-Trust.
- These are the principal risk factors which may affect the performance of the Fund. If you would like more information before you invest, please consult the most recent Declaration of Trust (DOT). The rights and duties of the investor are in the DOT.
- The Fund employs a risk management policy based on duration. Duration measures the sensitivity of NAVpU to interest rate movements. As interest rates rise, bond prices fall. The higher the duration, the more the NAVpU will fluctuate in relation to changes in interest rates.

managed by EW Trust Division. It is ideal for investors with long-term investment horizon of at least 10 years. The fund aims to match the return of the Philippine Stock Exchange Composite Index (PSEi).

#### Description of the Benchmark

- o The Philippine Stock Exchange (PSE) Index measures the relative changes in the free float-adjusted market capitalization of the 30 largest and most active common stocks listed at the PSE. (Source: Philippine Stock Exchange, Inc.) The PSEi's bucket of the top thirty (30) common stocks are based on a fixed set of rules that allow it to represent the general movement of the Philippine stock market.

#### Relation of the Benchmark's to the fund's objectives/investment strategies

- o The fund is designed for high-risk appetite investors looking for returns on their investments through capital appreciation of their investment. The fund will invest in Equities listed in the Philippine Stock Exchange.
- o However, there is a misalignment between the returns of fund and benchmark. This is due to the Total Returns and Taxable nature of the fund, which can create differences in their return.

**OUTLOOK AND STRATEGY.** Local equities gained 0.83% in December as shares rallied in the latter part of the month on yearend window-dressing. The Bangko Sentral ng Pilipinas cut its policy rate in December to bring its policy rate to 4.5% after November CPI rose 1.5% yoy. Benign inflation and five policy rate cuts by the central bank this year failed to lift market sentiment in 2025, which was weighed by government underspending in the second half of the year due to the ongoing corruption probe.

International Container Terminal Services Inc (ICT) was the best-performing index member with a 47% return, followed by LT Group, Inc (LTG) and Puregold Price Club, Inc (PGOLD) with returns of 41% and 23%, respectively.

Meanwhile, DigiPlus Interactive Corp (PLUS), Jollibee Foods Corp (JFC) and Monde Nissin Corp (MONDE) were the year's laggards with losses of 40%, 33% and 33%, respectively.

While the Philippines was the second-worst performing market among ASEAN-5 nations in 2025 (total return of -4.1%), it remained the cheapest among its peers in terms of forward P/E at 9.0x.

- The fund is designed for high-risk appetite investors looking for returns on their investments through capital appreciation of their investment through Philippine Equities.
- However, there is a misalignment between the returns of fund and benchmark. This is due to the Total Returns and Taxable nature of the fund, which can create immaterial differences in their return.

## **CLIENT SUITABILITY**

Client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Fund is suitable for investors who:

- (a) have high risk appetite; and
- (b) are looking for capital growth over an investment time horizon of ten (10) years through a managed portfolio of equity securities.
- (c) Are willing to accept higher risks involving volatility of return and possible erosion of principal for potentially better long-term results

## **KEY RISKS AND RISK MANAGEMENT**

### **You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.**

- The target fund, Philequity Fund Inc., employs a risk management policy based on appropriate diversification of investments intended to generate long-term appreciation of the Fund.
- Investors may not get back the value of their original investment upon redemption.
- The value of the Fund may rise or fall. You may lose some or all of your investment depending on the performance of the underlying securities. Factors that may affect the performance of these securities include, without limitation, market risks, fluctuations in interest rates, political instability, exchange controls, changes in taxation and foreign investment policies. Some of the key risks associated with the Fund are described below:
  - **Business Risk.** Stockholders as fractional owners of corporations share in the fortunes of the business. The rise and fall of stock prices often reflect the market's perception of the prospects of corporations and their management to reward stockholders for taking risks unique to each business. Business risk can be reduced through diversification.
  - **Country/ Political Risk.** Securities can be affected by the political, economic and social structures within the countries of their issuers, such as internal and external conflicts, currency devaluations, foreign ownership limitations, trading costs and tax increases.

<https://www.bsp.gov.ph>

- **Market Risk.** Market risk is the risk that the value of the fund investment will be negatively affected by the fluctuations in the price level of its underlying instruments.
- **Inflation Risk.** Affecting all investments, inflation reduces the purchasing power of money.
- **Liquidity Risk.** Liquidity is a measure of how easy it is for a security to be converted into cash. A liquid security is widely held and is frequently traded by many buyers and sellers every day. This is minimized by investing in marketable securities.
- **Interest Rate Risk.** The value of fixed-income investments such as notes and bonds generally falls when interest rates rise. The potential for loss is typically greater for securities that have a longer term to maturity, have a longer duration or have a lower yield or coupon rate.
- **Reinvestment Rate Risk.** This is the risk of reinvesting interest earnings at a rate lower than the original investment.
- **Credit Risk.** Bonds represent a loan made to the issuer of the bond. The credit worthiness of the bond issuer is the issuer's ability to pay interest and principal on time, which can change during the life of the bond. Issuers with a higher risk of defaulting pay the highest yields.

These are the principal risk factors which may affect the performance of the Fund. If you would like more information before you invest, please consult the most recent Declaration of Trust (DOT). The rights and duties of the investor are in the DOT.

## OTHER DISCLOSURES

RELATED PARTY TRANSACTIONS. The Fund's target fund (PhilEquity Fund, Inc.) may hold common shares of East West Banking Corporation and its related parties as part of its own discretionary active management. In addition, the fund has a time deposit placement with East West Banking Corporation amounting to P0.81 million.

OUTLOOK AND STRATEGY. Local equities gained 0.83% in December as shares rallied in the latter part of the month on yearend window-dressing. The Bangko Sentral ng Pilipinas cut its policy rate in December to bring its policy rate to 4.5% after November CPI rose 1.5% yoy. Benign inflation and five policy rate cuts by the central bank this year failed to lift market sentiment in 2025, which was weighed by government underspending in the second half of the year due to the ongoing corruption probe.

International Container Terminal Services Inc (ICT) was the best-performing index member with a 47% return, followed by LT Group, Inc (LTG) and Puregold Price Club, Inc (PGOLD) with returns of 41% and 23%, respectively.

Meanwhile, DigiPlus Interactive Corp (PLUS), Jollibee Foods Corp (JFC) and Monde Nissin Corp (MONDE) were the year's laggards with losses of 40%, 33% and 33%, respectively.

While the Philippines was the second-worst performing market among ASEAN-5 nations in 2025 (total return of -4.1%), it remained the cheapest among its peers in terms of forward P/E at 9.0x.

PROSPECTIVE INVESTMENT. The Fund's prospective investments, depending on availability and market development, may include but are not limited to, PhilEquity Fund, Time Deposits, Government Securities and tradable fixed income securities issued by local financial institutions or private corporations. Investment in the PhilEquity Fund may amount up to 100% of total assets but shall not fall below 90% of total assets of the Fund.

least 90% of its assets into its target fund, the iShares Core S&P 500 Exchange Traded Fund. The target fund tracks the benchmark. Its target fund holds the same underlying securities at the same weightings as the benchmark. It is ideal for investors with a long-term investment horizon who understand the investment risks involved when investing with equities. To invest in these securities, the fund has EastWest Banking Corporation as Trustee.

- Description and Key Characteristics of the Benchmark
  - o The S&P 500 is a stock market index tracking the performance of 500 large-cap companies listed on stock exchanges in the United States. It's considered a broad measure of the U.S. equity market and is often used as a benchmark for investment performance. The index is weighted by market capitalization, meaning companies with higher stock prices have a larger influence on the index's movement. It is not a Total Returns Benchmark nor is it net of taxes.
- Use of the Benchmark
  - o The fund is designed for high-risk appetite investors looking for returns on their investments that track the return of the Index Benchmark. As a feeder fund, this will be invested in another fund that tracks the S&P 500 index. The SPX Index benchmark would be the most appropriate as it aims to track its performance.
  - o However, there is a misalignment between the returns of fund and benchmark. This is due to the Total Returns and Taxable nature of the fund, which can create differences in their return.
- Relevant Sources for further benchmark information:
  - o S&P Dow Jones Indices (S&P 500® | S&P Dow Jones Indices (spglobal.com))
  - o Bloomberg. For additional information on the benchmark, investors may send an email to Bloomberg via [indexhelp@bloomberg.net](mailto:indexhelp@bloomberg.net)
  - o Additional information on the benchmark and/or its administrator can be made available to the investor upon request.

## **CLIENT SUITABILITY**

---

Client profiling process should be performed prior to participating in the Fund to guide the prospective investor if the Fund is suited to his/her investment objectives and risk tolerance. Clients are advised to read the Declaration of Trust/Plan Rules of the Fund, which may be obtained from the Trustee, before deciding to invest.

The Fund is suitable for investors who:

- (a) have high risk appetite; and
- (b) are looking for capital growth over an investment time horizon of at least five (5) years through a managed portfolio of equity securities.
- (c) are willing to accept higher risks involving volatility of return and possible erosion of principal for potentially better long-term results

## **KEY RISKS AND RISK MANAGEMENT**

---

**You should not invest in this Fund if you do not understand or are not comfortable with the accompanying risks.**

- The target fund, iShares Core S&P 500 Exchange Traded Fund, employs a risk management policy based on appropriate diversification of investments intended to generate long term appreciation of the Fund.
- Investors may not get back the value of their original investment upon redemption.
- The value of the Fund may rise or fall. You may lose some or all of your investment depending on the performance of the underlying securities. Factors that may affect the performance of these securities include, without limitation, market risks, fluctuations in interest rates, political instability, exchange controls, changes in taxation and foreign investment policies. Some of the key risks associated with the Fund are described below:
  - Counterparty risk – Potential or actual losses arising from risks particular to a feeder fund arrangement, as the fund is significantly dependent upon the target fund's communicated investment strategy including excessive concentration as well as timing of data transmittal.
  - Market risk – Potential or actual losses arising from adverse changes in market prices of securities.
  - Liquidity Risk – Potential or actual losses arising from the Fund's inability to convert its assets into cash immediately at minimal cost.

**OUTLOOK AND STRATEGY.** The S&P 500 declined 0.1% in December after the Federal Reserve cut its policy rate by 25 basis points, but the Fed's updated forecasts indicated only one rate cut each in 2026 and 2027. A mid-month rally pushed the broad index to new record highs before giving way to profit-taking to close the year at 6,845.50. This marked a third consecutive year of double-digit returns.

It was mixed month for US stocks, with five sectors posting gains against six sectors, including tech, which registered monthly losses. Financials, materials and industrials led sector gainers while utilities, real estate and consumer staples were the laggards.

Federal Reserve Chair Jerome Powell warned that some of the recent economic data may be distorted due to the government shutdown, which suggests policymakers will likely stay on hold until they get more data going forward. Mr. Powell's term as chair will end in May 2026.

**PROSPECTIVE INVESTMENT.** The Fund's prospective investments, depending on availability and market development, may include but are not limited to, iShares Core S&P 500 ETF, Time Deposits, Government Securities and tradable fixed income securities issued by local financial institutions or private corporations. Investment in the iShares Core S&P 500 ETF may amount to 100% of total assets but shall not fall below 90% of total assets of the Fund.
